Hello,

My name is Colton, I am the network admin for CVTD. I am emailing you about helping with the CVTD api.

What format are you looking to use?

Thanks

Colton Fullmer

Network Administrator.

Cache Valley Transit District

Cfullmer@cvtdbus.org

Hi Colton,

Thanks for responding. What are my options? Sorry I don't really understand your question. Do you mean like json or something like that?

Hello Daniel,

We have an XML feed that is for each bus for that day per route. It gets the 5 most recent lat,lons and assigns them to the route/bus. I have set you up with a developer key and link. This link is real time. It is going to show the exact location that bus on the route is at. As long as the route is active according to the schedule.

http://cvtd.info:8080/CVTDfeed/V200/XML/_System.php?key=ickRPykjYcqOL8EAu7a8

Let me know If you have any questions on this.

We also have a google GTFS file with our schedules and routes. Outputted in the standard for google.

Thanks again.

Colton,

Thanks, I have it working now. Can I have access to the bus stops/routes as well, please? Thanks for your help!

Daniel,

http://cvtd.info:8080/CVTDfeed/V200/XML/System.php?key=ickRPykjYcqOL8EAu7a8 Forgot to send you this one. It has a little more info just in case you wanted to use it.

Would you like the GTFS file or in an XML feed for routes and stops?

The GTFS is on our website. https://cvtdbus.org/developer/ in the first paragraph click here.

XML feed is bellow

http://cvtd.info:8080/CVTDfeed/V200/XML/DBStops.php?key=ickRPykjYcqOL8EAu7a8

http://cvtd.info:8080/CVTDfeed/V200/XML/DBStopOrder.php?key=ickRPykjYcqOL8EAu7a8

http://cvtd.info:8080/CVTDfeed/V200/XML/DBRoutes.php?key=ickRPykjYcqOL8EAu7a8

http://cvtd.info:8080/CVTDfeed/V200/XML/DBRoutePath.php?key=ickRPykjYcqOL8EAu7a8

http://cvtd.info:8080/CVTDfeed/V200/XML/DBSHeadSign.php?key=ickRPykjYcqOL8EAu7a8

http://cvtd.info:8080/CVTDfeed/V200/XML/Detours.php?key=ickRPykjYcqOL8EAu7a8

Let me know if this helps.

Thanks
